APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
10/564,695	01/11/2006	Kyoko Inao	KYOKA -2-PCT/Minori	2226
156 7590 09/30/2008 KIRSCHSTEIN, OTTINGER, ISRAEL & SCHIFFMILLER, P.C. 425 FIFTH AVENUE 5TH FLOOR NEW YORK, NY 10016-2223			EXAMINER SCHLENTZ, NATHAN W	
			ART UNIT 1616	PAPER NUMBER
			MAIL DATE 09/30/2008	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/564,695	Applicant(s) INAO, KYOKO	
	Examiner Nathan W. Schlientz	Art Unit 1616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 18-25 is/are pending in the application.
- 4a) Of the above claim(s) 24 and 25 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 18-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 18-23, drawn to a composition comprising a lower alcohol and at least one glycol ether, classified in class 504, subclass 114.
- II. Claims 24 and 25, drawn to a process for producing artificial flowers, classified in class 428, subclasses 17 and 24.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, JP 54-10033 (listed on the IDS filed 11 January 2006) discloses a method for preserving living flowers or leaves by treating with N,N-dimethylformamide and polyethylene glycol.

2. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;

- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is

Art Unit: 1616

the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. During a telephone conversation with attorney Alan Israel on 08 May 2008 a provisional election was made with traverse to prosecute the invention of Group I, claims 18-23. Claims 24 and 25 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Status of Claims

Claims 1-17 were cancelled and claims 18-25 newly added in a preliminary amendment filed 10 February 2006. Claims 24 and 25 are withdrawn from further consideration as being drawn to a non-elected invention. As a result, claims 18-23 are examined herein on the merits for patentability. No claim is allowed at this time.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1616

1. Claims 18, 21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujii (JP 2001-233702 A; machine-generated English language translation referred to herein).

Fujii discloses immersing a plant body in a preservation solution comprising polyhydric alcohol, a lower alcohol and a dye to allow the polyhydric alcohol to be taken into and absorbed in the plant body tissue replacing the water within the plant body tissue, followed by removing the lower alcohol (Abstract). Fujii discloses that the polyhydric alcohol is chosen from glycerol, ethylene glycol, propylene glycol, 1,3-butylene glycol, sorbitol, and diethylene glycol ([0004] and [0008]), and the lower alcohol is chosen from ethyl alcohol, methyl alcohol, butyl alcohol and isopropyl alcohol

2. Claims 18-21 and 23 rejected under 35 U.S.C. 102(a) as being anticipated by Sakamoto (JP 2004-099605 A; machine-generated English language translation referred to herein).

Sakamoto discloses a method for preserving cut flowers comprising soaking the flower in a solution comprising a mixture of polyvalent alcohol and an alcohol to substitute the tissue water and air existing in the flower with the polyvalent alcohol (Abstract). Sakamoto discloses that the polyvalent alcohol is ethylene glycol, glycerol or polyethylene glycol, and the alcohol is methanol, ethanol, butanol, isopropanol or cellosolve (a.k.a., glycol ethers) (Abstract). Sakamoto further discloses the addition of a pigment to the alcohol solution; as well as drying the flower after replacing the tissue water and air with polyhydric alcohol ([0009] and Claims 2 and 3). Sakamoto discloses

Art Unit: 1616

an example wherein a white rose was soaked in dehydrated ethanol for 6 hours, immersed in a solution of polyethylene glycol, cellosolve, ethanol and pigment for 48 hours, dipped in ethanol for 5 minutes, and finally bleached then dried (Work Example 2).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1,148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
1. Claims 18 and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujii (JP 2001-233702 A) in view of Fessenden (US 2,658,836).

Applicant claims:

Applicants claim a finishing agent for producing artificial flowers comprising a lower alcohol, at least one glycol ether, and a dye, wherein an oxidation inhibitor is contained.

Determination of the scope and content of the prior art

(MPEP 2141.01)

The teachings of Fujii are discussed above and incorporated herein by reference.

Ascertainment of the difference between the prior art and the claims

(MPEP 2141.02)

Fujii does not explicitly teach the preservation composition to comprise an oxidation inhibitor, as instantly claimed. However, Fessenden teaches a method for preserving biological material, such as flowers and other plant parts (col. 1, ll. 20-22). Fessenden teaches that when preserving plant and animal tissues, the color of which is altered or destroyed by oxidation, stabilization of the natural color requires the use of oxidation inhibitors that are capable of exerting a reducing action strong enough to prevent oxidative color change in the tissues (col. 5, ll. 57-63).

Finding of *prima facie* obviousness

Rational and Motivation (MPEP 2142-43)

Therefore, it would have been *prima facie* obvious for one of ordinary skill in the art at the time of the invention to include an oxidation inhibitor into the preservation composition of Fujii in order to prevent oxidative color change in the plants, as reasonably taught by Fessenden.

From the teachings of the references, it is apparent that one of ordinary skill in the art would have had a reasonable expectation of success in producing the claimed invention. Therefore, the invention as a whole would have been *prima facie* obvious to

Art Unit: 1616

one of ordinary skill in the art at the time the invention was made, as evidenced by the references, especially in the absence of evidence to the contrary.

2. Claims 18-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakamoto (JP 2004-099605 A) in view of Fessenden (US 2,658,836).

Applicant claims:

Applicants claim a finishing agent for producing artificial flowers comprising a lower alcohol, at least one glycol ether, and a dye, wherein an oxidation inhibitor is contained.

Determination of the scope and content of the prior art

(MPEP 2141.01)

The teachings of Sakamoto are discussed above and incorporated herein by reference.

Ascertainment of the difference between the prior art and the claims

(MPEP 2141.02)

Sakamoto does not explicitly teach the flower preservation composition to comprise an oxidation inhibitor, as instantly claimed. However, Fessenden teaches a method for preserving biological material, such as flowers and other plant parts (col. 1, ll. 20-22). Fessenden teaches that when preserving plant and animal tissues, the color of which is altered or destroyed by oxidation, stabilization of the natural color requires the use of oxidation inhibitors that are capable of exerting a reducing action strong enough to prevent oxidative color change in the tissues (col. 5, ll. 57-63).

Finding of *prima facie* obviousness

Rational and Motivation (MPEP 2142-43)

Therefore, it would have been *prima facie* obvious for one of ordinary skill in the art at the time of the invention to include an oxidation inhibitor into the preservation composition of Fujii in order to prevent oxidative color change in the plants, as reasonably taught by Fessenden.

From the teachings of the references, it is apparent that one of ordinary skill in the art would have had a reasonable expectation of success in producing the claimed invention. Therefore, the invention as a whole would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, as evidenced by the references, especially in the absence of evidence to the contrary.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathan W. Schlientz whose telephone number is 571-272-9924. The examiner can normally be reached on 8:30 AM to 5:00 PM, Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
